### Synopsis

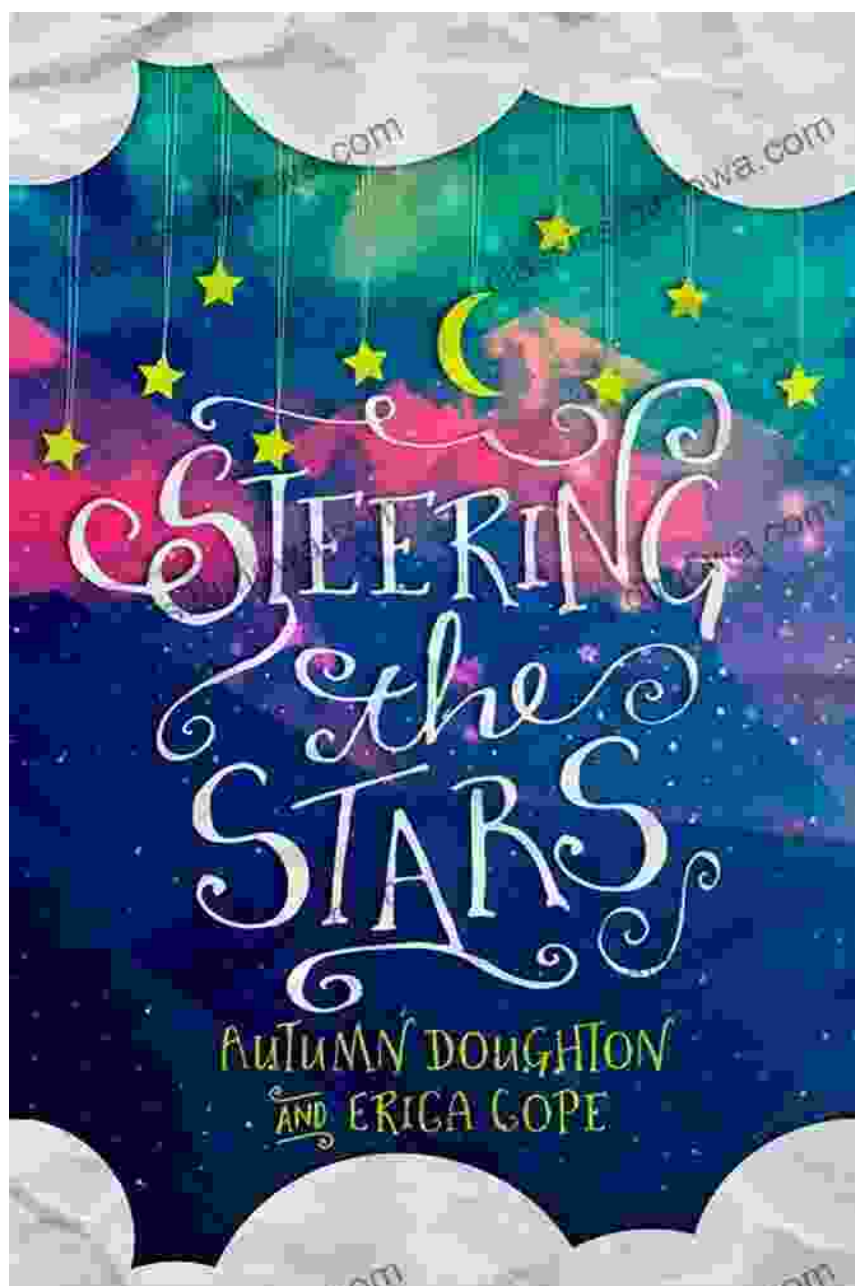

In the vast expanse of the Andromeda galaxy, a young woman named Anya embarks on an extraordinary journey that will test her limits and redefine her understanding of the universe.

Anya is a brilliant astrophysicist, but she has always felt like an outsider. When she is chosen to join a team of explorers on a mission to a distant star system, she finally feels like she has found her place.

But the mission is not without its challenges. The crew faces danger at every turn, from deadly space storms to hostile alien life forms. And as Anya delves deeper into the unknown, she begins to question everything she thought she knew about the universe.

"Steering the Stars" is a thrilling and thought-provoking science fiction novel that will appeal to readers of all ages. It is a story about exploration, discovery, and the human spirit.

### **About the Author**

Autumn Doughton is a lifelong lover of science fiction and fantasy. She has written short stories and poems for many years, and "Steering the Stars" is

her first novel.

Autumn has a degree in astrophysics from the University of California, Berkeley. She currently lives in San Francisco, where she works as a software engineer by day and writes by night.
