Ancient Sentinels: The Redwood, Baobab, and Ginkgo

Adams begins his exploration with the colossal redwoods of California, trees that dwarf all others and have witnessed the rise and fall of civilizations. These ancient giants, with their cinnamon-red bark and towering heights, are emblems of resilience and longevity.

From the towering redwoods, Adams transports readers to the African savanna, where the majestic baobab trees stand as enigmatic figures. With their bulbous trunks and sprawling branches, these trees provide sanctuary to countless creatures and serve as living water tanks in arid landscapes.

Another ancient survivor, the ginkgo tree, takes center stage as Adams delves into its remarkable history. The sole survivor of its ancient lineage

and renowned for its fan-shaped leaves, the ginkgo has witnessed the evolution of life on Earth firsthand.

habitat for countless creatures. Their intricate web of life supports the survival of entire ecosystems.
