The Childhood Years: Shaping the Foundation

Benjamin Franklin was born on January 17, 1706, in Boston, Massachusetts. His father, Josiah Franklin, was a candle and soap maker, while his mother, Abiah Folger, was a devout Puritan. Franklin was the tenth of seventeen children, and his childhood was marked by both poverty and a deep love of learning.

From an early age, Franklin exhibited an unquenchable thirst for knowledge. He read voraciously, absorbing everything from history and science to theology and philosophy. His insatiable curiosity extended beyond books, as he spent countless hours observing the natural world and conducting his own experiments.

Education and Apprenticeship: Igniting the Spark

Franklin's formal education was limited. He attended Boston Latin School for two years, but his father's financial struggles forced him to drop out at the age of ten. Determined to pursue his intellectual interests, Franklin continued to educate himself through extensive reading and self-study.

At the age of twelve, Franklin was apprenticed to his brother James, a printer. It was during this apprenticeship that Franklin's interest in writing and publishing took root. He devoured every book that came into the print shop, and he began to write and publish his own essays and pamphlets.

Franklin's apprenticeship also introduced him to the world of business and commerce. He quickly mastered the printing trade and developed a keen understanding of the financial world. These skills would prove invaluable in his later career as a successful entrepreneur and publisher.
